

Guide for Using NeighborhoodInfo DC

Data profiles are available for neighborhood clusters, wards, census tracts, police service areas, and advisory neighborhood commissions. Information on population, income, housing, crime and more are provided with some historic data. The NeighborhoodInfo DC Resource Center includes reports with neighborhood level data.

On the web, go to <http://neighborhoodinfodc.org>

Neighborhood Profiles

- Click the **Neighborhood Profiles** tab at the top of the page to reach the screen below.

The screenshot shows a Microsoft Internet Explorer browser window displaying the NeighborhoodInfo DC website. The address bar shows <http://neighborhoodinfodc.org/profiles.html>. The website header features a navigation menu with the following items: Home, About Us, Neighborhood Profiles (highlighted), Resource Center, and Ask a Question. The main content area is titled "Neighborhood Profiles" and contains the following text:

On this web site, you'll find data on D.C. neighborhoods — population, race and ethnicity, income, poverty, employment, education, public assistance, single-parent families, low weight and teen births, income, housing, crime and more.

First, choose a geography within the District..
The District can be organized into many different geographies and, depending on the work you do, you'll want to look at data for different areas within the city. Here are the geographic areas for which we provide data on this web site:

- [Council Wards](#) The 8 Council Wards are political areas used to elect members of the City Council.
- [Advisory Neighborhood Commissions \(ANCs\)](#) The 37 Advisory Neighborhood Commissions (ANCs) are subdivisions of the District's Wards. Representatives from ANCs are elected to advise the District government on issues relating to zoning, social service programs, health, police protection, sanitation, and recreation.
- [Neighborhood Clusters](#) There are 39 neighborhood clusters throughout the city, each made up of three to five neighborhoods. Neighborhood clusters are being used by the D.C. government for budgeting, planning, service delivery, and analysis purposes.
- [Police Service Areas \(PSAs\)](#) These 45 Police Service Areas are the way the Police Department currently organizes its services within the city.
- [Census Tracts](#) There are 188 census tracts in the District. Census tracts are small geographic areas defined for collecting and reporting data from the U.S. Census.

- First, choose a geography within the District. The different geographic areas with available data profiles on this site are City Council Wards, Advisory Neighborhood Commissions (ANCs), Neighborhood Clusters, Police Service Areas (PSAs), and Census Tracts.

- Select a link, such as Wards to reach a set of links for each geography. This will bring you to the screen on the following page.

The screenshot shows a Microsoft Internet Explorer browser window with the address <http://neighborhoodinfodc.org/wards/wards.html>. The website header features the NeighborhoodInfo DC logo and a navigation menu with links for Home, About Us, Neighborhood Profiles, Resource Center, and Ask a Question. The main content area is titled "Neighborhood Profiles" and "Council Wards". It explains that the 8 Council Wards are political areas used to elect members of the City Council. It provides a link to the DC Atlas for looking up a specific address: <http://citizenatlas.dc.gov/atlasapps/repothometab.aspx>. Below this, it instructs users to select an area to view data for Council Wards using the following links: [Ward 1](#) | [Ward 2](#) | [Ward 3](#) | [Ward 4](#) | [Ward 5](#) | [Ward 6](#) | [Ward 7](#) | [Ward 8](#). A map of Washington DC Wards is displayed, showing the outlines of the wards. Ward 5 is highlighted in a darker green color, and a small box labeled "Ward 5" is positioned to its right. The numbers 3 and 4 are also visible on the map.

- Click on a Ward to see a data profile. This will bring you to the screen on the following page.
